10  
10 RECOMMENDATIONS  
FOR CITIZEN ACTION  
GROUPS

This study was undertaken as part of the 'Global Research Academy' research programme (2022-23), funded jointly by the Universidade de São Paulo, Freie Universität Berlin, and King's College London. The authors declare no conflicts of interest with respect to any financial interests or benefits relating to this study.

This document is created as an alternative mode of knowledge dissemination.

The research "GUARANTEEING GREEN: URBAN SUSTAINABILITY, CITIZEN PARTICIPATION AND GREEN SPACES IN CITIES" was conducted by Mathias Foit, Alice Hodgson-Casson, Andre Miquelasi, Luciano Santander Hoces, Raiana Schirmer.

# DECALOGUE OF GOOD PRACTICES:

## 10 RECOMMENDATIONS FOR CITIZEN ACTION GROUPS

1.

## USE THE SPACE

If a green space becomes popular among the local community, whether it's for sport or family activities, it will be more difficult for investors to claim and develop that area.

2.

## INTERVENE EARLY

It is easier to stop development in initial planning stages rather than when development begins.

3.

## MAP THE STAKEHOLDERS

Mapping the actors involved in the struggle is essential for getting the community to understand whom they are fighting against or alongside.

4.

## **FIGHT FOR THE OBVIOUS**

Development can often be contested in legal proceedings. Therefore, knowing the legal status of the land you are trying to protect, who owns it and why can be very helpful in fighting development through legal routes.

6.

## **SECURE THE SUPPORT OF THE**

Community support is vital - establishing face-to-face contact and making yourselves recognisable to the local community is much more effective than hundreds of social media posts.

7.

## CONNECT THE COMMUNITY

Reaching out to similar initiatives or organisations can be very useful in seeking local or national advice, as well as experiences or tips from others that have fought through the same situation.

8.

## BE PROACTIVE

Resistance is crucial, but taking a more proactive stance is just as important. Fighting for greater formal protections for green areas might help defend other green spaces in the future.

9.

## ENGAGE LOCAL POLITICIANS

Contacting and building a relationship with a local politician to use their influence with the local or national government may be helpful in ensuring your goals are met.

10.

## STAY ALERT

No victory is absolute. Stay vigilant, so that new threats to the green space can be averted

GOOD

# 3 RECOMMENDATIONS FOR LOCAL GOVERNMENTS

2023

1.

## **CREATE A TRUE CULTURE OF DIALOGUE**

Commit to listening to the needs of communities and act on their suggestions. Don't treat consultation as a box-ticking exercise.

2.

## BE CONSISTENT AND THINK OF SOCIAL JUSTICE

Legal protections for green spaces should be made clear and be implemented consistently throughout a city, without favouring higher-income areas over lower-income areas.

3.

## REDRESS POWER IMBALANCES

Remember that all actors involved are not equally resourceful and do not have the same amount of power. An intermediary or third party should be present to treat all actors on an equitable playing field and make an effort that both parties are treated conscientiously.
